"Most of my search for new nudibranch species over the last two decades has focused on the reefs of the Philippines (map). This area has been shown to have more species of reef fish, soft corals, and nudibranchs than any other place in the world. Here we continue to find new species of nudibranchs at the average rate of one new species per dive."

Why hasn't there been a focus on all the federal and state money stolen in school districts that never reaches the classroom? I have been writing about it for 14 years and the DEMOCRATS have never DONE ANYTHING ABOUT IT IN CALIFORNIA. THE SACRAMENTO SCHOOL DISTRICT HAS DEVELOPED IT INTO AN ART FORM. Yolo County is the ...Mississippi of the 60's. It is why Latino and other minority parents are not invited to participate in our schools. Its the best white collar crime in America. I am going to ask for your help among others to change that dynamic.
